Since implementing ReThink Disposable’s recommendations, Café Umami reduced their use of targeted disposable foodware items by an average 49% and is preventing the use of 52,576 disposable items and 928 pounds of waste annually. Café Umami earns an ongoing annual net cost savings of $1,538 from the avoided disposable foodware purchases. In order to implement the recommendations, the owner spent $436.59 to purchase the reusable foodware.

At first glance, this cafe did not appear to be an ideal program candidate because most items were served with reusable plates, bowls, and cups. However, when ReThink Disposable introduced one recommendation to the owner to reduce packaging and waste and save money (replace plastic cold cups with reusable ones), it soon became apparent that there were other potential single-use items to target. Most importantly, there was a significant opportunity to train staff to default to reusables for dine-in guests by always asking if an order is “for-here” or “to-go.” Park and Lee needed assistance in identifying less obvious single-use items that could be reduced and eliminated, and motivation to make a few operational changes like encouraging dine-in and stocking up on the reusables they already had.

The type of reusable cups purchased by the owner are being used for both hot and cold beverages and the plates that were purchased did not just replace a disposable plate, but also supplemented reusable bowls so fewer disposable bowls are used during rush times. The business owners were able to take advantage of StopWaste’s mini-grant to purchase the items they needed to set up for successful implementation.

Packaging Practices prior to ReThink Disposable:
- Food orders served in a mix of reusable bowls and plates, but with disposable plastic bowls
- Cold beverages served in disposable plastic cups with lids and straws
- Hot drinks served in a mix of ceramic mugs or disposable paper cups with lids and sleeves (default is to a disposable unless the customer requests a “real” cup)
- Guests were offered stainless steel cutlery but disposable wooden chopsticks
- Napkins stacked in the self-serve area and on the counter
- During rush periods, staff defaulted to disposable plastic bowls

Recommendations Implemented:
- Replaced disposable plastic cold cups, lids, and straws with reusable cups
- Increased limited supply of dishes and mugs and prioritized use of reusable dishware over disposable
- Staff now ask if guests are dining in the café for each order

**Total** 52,576 $1,538 928 lbs.

*Net Cost Impact considers any upfront and ongoing costs associated with the purchase and care of reusable items and capital improvements needed to carry out ReThink Disposable’s recommendations. Net cost savings are based on avoided disposable foodware purchases.

---

### THE BOTTOM LINE

- $1,538 in annual net cost savings
- 52,576 disposable items reduced per year
- 928 pounds of annual waste reduction
- 49% average reduction of disposable foodware used

---

**Sungsoon Park, Co-owner:** “Every business should use reusables, it’s a sustainable option. There’s no question or concern about this. It’s just common sense.”
